

Ladiga Trail Connection Opportunity

Activating Access, Visibility, and Community Engagement in North Anniston

Located directly behind Walmart and Tractor Supply, this high-visibility corridor offers a unique opportunity to connect Anniston’s expanding commercial development with the newly extended Ladiga Trail—and with our growing flower farm and future event space.

As owners and caretakers of the adjacent land, we envision this area becoming a vibrant, public-facing node:

- A **small access road** across the trail from the curbside pickup area
- A **city-facing billboard** for events, initiatives, and local business visibility
- A **trail rest stop** with water refill, shaded seating, and potential local goods

This project creates a **low-impact, high-visibility connection** between Anniston’s retail hub and a locally-rooted space that blends agriculture, hospitality, and community engagement—designed to complement the momentum of the Summerall Subdivision and North Anniston’s revitalization efforts.

We believe this is where beauty, access, and community connection meet—right at the intersection of trail, town, and story.
